Dimensions: 1,500 x 400 mm | 3,000 x 400 mm

Sorting conveyor is used in a fruit, berry and vegetable processing line for sorting and drying the products. Two different length sorting conveyors: 1,5 m and 3 m length.

MINIMILL

Fruit and Vegetable Crusher

Capacity: up to 800 kg/h

Fruit crusher is used for crushing products before further processing.

MAXIMILL 1000

Fruit and Vegetable Washer Elevator Mill

Capacity: 1,000 kg/h

Fruit Washer Elevator Mill MAXIMILL 1000 is designed for washing, transporting and milling fruits and vegetables before further processing.

MAXIMILL 3000

Fruit and Vegetable Washer Elevator Mill

Capacity: 3,000 kg/h

Washer-Elevator Mill MAXIMILL 3000 is designed for washing, transporting and milling of fruits and vegetables before further processing.

DOSIMILL – with dosing unit

Fruit and Vegetable Washer Elevator Mill

Capacity: 1,000 kg/h

Fruit and vegetable washer elevator mill with dosing unit is used for washing and milling various products and dosing the grinded mash into hydraulic press or destoning machine.

Fruit and Vegetable Washer Elevator

Capacity: 3,000 kg/h

Fruit Washer Elevator is designed to wash and transport various fruits and vegetables before further processing. Machine does not have a mill.

AQUAMILL

Fruit Bubble Washer Elevator Mill

Capacity: 3,000 kg/h

Fruit bubble washer elevator mill AQUAMILL provides bubble washing of products and crushes them into a mash for further processing.

Fruit Crusher

Berry and Soft Fruit Crusher

Capacity: 3,000 kg/h

Berry and fruit crusher is used for crushing products before further processing.
